

Ultrel™ Solution Dyed Nylon

Mustard Stain

Cleaned without harsh Chemical

# Ultrel™ Solution Dyed Nylon

Overcome your fear of spills because **Ultrel™ Solution Dyed Nylon** is no ordinary nylon.

Stain blocking hydrocarbons become part of the nylon fibre resulting in a superior carpet that is virtually stain proof.

Engineered for areas with both heavy traffic and frequent spills.

## the problem:

Every year millions of square metres of carpet are replaced prematurely due to permanent stains and spots. Most carpets have no built-in stain protection or stain warranty. Carpets made of Ultrel™ Solution Dyed Nylon have built-in stain protection and are backed by our Stain Resist warranty.

## the solution:

**Stain Resist:** Industry standard stain warranties exclude stains that are commonly found in the environments. Our Stain Resist warranty covers all stains including coffee, tea, mustard, beets and harsh cleaners.

**Colourfast:** Ultrel™ Solution Dyed Nylon use only the highest quality pigments. Premium quality pigments are more resistant to fading from UV exposure. Ultrel™ Solution Dyed Nylon is backed by our Colourfast warranty.

## recommended

*for areas with heavy traffic and where spills may occur.*

- Institutional
- Healthcare facilities
- Food service areas
- Offices
- Airports
- Hospitality

### Ultrel™ Solution Dyed Nylon

#### Colour to the core.

Colour and performance additives are an integral part of the Ultrel fibre as they are introduced to the polymer before the fibre is extruded.

#### Advanced fibre engineering

Ultrel™ features WideBody LDPF Filaments™ and Optimal Cross Section™

fibre geometry for

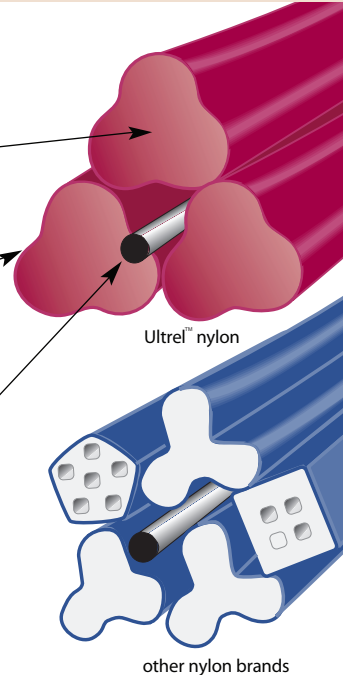

- stronger, tougher, firmer carpet,
- less soil build-up

#### Permanent static control

Ultrel™ fibre includes conductive filaments

#### Other nylon brands

Illustration shows conventional liquid dyeing restricted to the fibre surface and the varying geometry and fibre scale.

Accidental spills of common household chemicals can cause damage to conventionally dyed nylon. Cleaned as directed, carpets of Ultrel™ Solution Dyed Nylon can withstand most 'crisis' spills. Most spots can be removed using our standard cleaning methods. Even bleach solutions can be used as directed to remove stubborn stains without damaging the carpet's colour.

**Fade Resistant for today's buildings:** Contemporary architectural trends expose carpet and interior surfaces to more sunlight than ever before.

Ultrel™ Solution Dyed Nylon with UV stabilisers ensure a high degree of colour fastness and lasting colour.

## environmental choice

- Prevents premature carpet replacement due to staining.
- Remove most spots without harsh chemicals.
- Protection system accepted by the Environmental Protection Agency.
