RE: CARDBOARD RECYCLING

Dear Baudouin,

On behalf of Visy Recycling Gold Coast I would like to congratulate you and your team at Northstate Carpet Mills on the fantastic job you are doing by recycling all of your used cardboard cores and waste paper.

In the last twelve months Northstate Carpet Mills have recycled over 95 tonnes of cardboard waste. Did you know that one tonne of recycled paper or cardboard save?

- Approximately 13 Trees
- 2.5 Barrels of oil
- 4100 kwh of electricity
- 4 cubic metre of landfill
- 31,780 litres of water

So in the last twelve months, Northstate Carpet Mills have saved over 1235 trees from needlessly being chopped down, that's great news for the environment. Not only are you doing your bit for the environment, it also makes good business sense, by separating your cardboard and paper waste from your general waste, Northstate Carpet Mills are saving thousands of dollars off waste disposal fees.

Visy Recycling is looking forward to working with Northstate Carpet Mills in the future; we value your commitment towards recycling products, formerly destined for landfill.

Kind Regards

VISY RECYCLING

Scott Kachel
